

Displaying a news listing on a page

Select the 'Modules' tab of your page and drag the module onto the page.

From here you can set the start and end date of your listing.

You can also specify news groups to display by ticking the check box next to the group name. If no groups are selected, all groups will be shown by default.

'Max Items to display' lets you choose how many news items are displayed in the list before it is paginated.

'Max Words to display' lets you choose how many words are shown of the summary.

'Display URL' is the location of the page where you have placed a 'News Display' module.

Underneath this, there are 4 more display options to select; 'Show Pagination', 'Show RSS Link', 'Show Summary' and 'Show Date'.

To add this module, click save in the top left, or click cancel to discard any changes.

This page can now either be saved or published by clicking save in the top right corner. To discard any changes, click cancel.
