

Adding a module that displays on every page of a template

From the main menu click on the 'Advanced' tab -> templates »

Edit the template you wish to add the module

Click on the modules tab and start dragging the module boxes into the correct placeholders. These will be displayed on every page of the template.

Please note the navigation module can only be added at template level using this process. Refer to 'navigation menu styles' for more information regarding this module.

Recommended modules to add at template level

Navigation

Breadcrumb

Date - Options to specify the format

Footer - A content module can be used for this

Headline - Automatically displays the name of the page

Search Box - You can specify the text for the search label in this module. (Note: search results module will have to be used on the search site page) This can be achieved at the page level. Refer to 'Adding/editing a page' for more details
